

FORMULATED FOR ADULT DOGS.

- Advanced Support for Overall Physical & Mental Wellbeing in the Prime of Life
- Complete Multivitamin/Mineral Formula Ensures Adequate Nutrition

VITAL ORGAN SUPPORT.

- Supports Bone, Cartilage, Teeth, Red Blood Cells & Soft Tissue Formation
- Aids the Liver, Muscular Function & Vision While Helping Maintain Tissue of the Lungs, Intestines, Skin & Coat

IMMUNE HEALTH.

- Echinacea Supports Immune System
- Helps Maintain Proper Hydration & Electrolyte Balance

ULTRA PREMIUM ADULT MULTI + IMMUNITY

The goal of every dog owner is to prolong the most robust years of their animal's life. This formula has been developed to do just that by promoting the health of major organs throughout the body. Adult Multi + supports the formation of bones, cartilage, teeth, red blood cells and soft tissue. It aids the liver, muscular function and vision while helping to maintain the tissue of the lungs, intestines and skin as well as coat health. Plus, 100mg of Echinacea per soft chew supports the immune system.

DIRECTIONS FOR USE

Dogs up to 20 lbs: 1 Soft Chew Daily
Dogs 21 to 40 lbs: 2 Soft Chews Daily
Dogs 41 to 60 lbs: 3 Soft Chews Daily
Dogs Over 60 lbs: 4 Soft Chews Daily

This Scientifically Formulated Adult Dog Multivitamin Includes the Following Active Ingredients per Soft Chew

WATER SOLUBLE VITAMINS

Have to be supplied on a daily basis because they are continually broken down and excreted.

Choline – 75mg

Required for proper transmission of nerve impulses and utilization of sulfur-containing amino acids.

Pantothenic Acid – 2mg

Required for energy and for protein metabolism.

Thiamine – 500mcg

Promotes a good appetite and normal growth. Is required for energy production.

Riboflavin – 500mcg

Promotes growth.

Folic Acid – 50mcg

Works together with vitamin B12 in many of the bodies chemical reactions.

Biotin – 5mcg

A component of several important enzyme systems.

Niacinamide – 20mg

A constituent of many enzymes that process carbohydrates, proteins and fats.

Pyridoxine – 1mg

Important in the metabolism of proteins and in the formation of red blood cells.

Vitamin C – 50mg

Participates in the formation of bones, teeth and soft tissue. Is an antioxidant that is helpful during times of stress. It is abundant in fresh foods, but is killed during the high temperature processing of dog foods.

Vitamin B12 – 0.8mcg

Necessary for normal DNA synthesis and intestinal function.

FAT SOLUBLE VITAMINS

Vitamin A – 1,000 IU

Necessary for proper vision, especially night vision. Important in bone growth, reproduction, and maintenance of tissues such as the lungs, intestines and skin.

Vitamin D3 – 50 IU

Critical to the dog's ability to use calcium and phosphorus for bone and cartilage growth and maintenance.

Vitamin E – 10 IU

An Antioxidant that protects cells from oxidative damage. Especially important for muscular and reproductive function. Is helpful during times of stress. Is abundant in fresh foods, but is killed during the high temperature processing of dog foods.

Vitamin K – 50mcg

Essential for normal blood clotting.

MINERALS

Minerals are present in small amounts in the tissues of all living things. Teeth, bones, muscles and nerves have especially high mineral content. Minerals can be divided into two groups: the major minerals and the trace minerals.

MAJOR MINERALS

Required in gram amounts each day.

Magnesium – 3mg

Essential for many of the cells enzymatic reactions. Also helps promote the absorption and metabolism of many other vitamins and minerals, including vitamins C and E, calcium and phosphorus. Important in bone growth and development.

Potassium – 1mg

Helps nerves to function and muscles to contract. Helps heartbeat to stay regular. Also helps move nutrients into cells and waste products out of cells.

TRACE MINERALS

Required in milligrams or microgram amounts per day.

Iron – 2mg

Is present in every cell in the body. It is particularly important, along with protein and copper, for the production of red blood cells, which are responsible for transporting oxygen from the lungs to every part of the body.

Copper – 50mcg

A trace mineral that has many different functions. It is needed for the production of blood and for the proper absorption of iron. It is also involved in the production of connective tissue and in healing.

Zinc – 2mg

Important in the metabolism of several vitamins, particularly the B-vitamins. Is a component of several enzymes needed for digestion and metabolism. Also promotes healing. Required for proper coat health.

AMINO ACIDS

L-Taurine – 50mg

Taurine is found in several organs with widespread benefits. Direct roles include: Maintaining proper hydration and electrolyte balance, forming bile salts (important for digestion), regulating minerals such as calcium within cells, supporting the general function of the central nervous system and eyes, regulating immune system health and antioxidant function.

BOTANICALS

Echinacea – 100mg

Stimulates the immune system.

Borage Oil – 50mg

A fatty acid that nourishes the skin and acts as an anti-inflammatory.

Linseed Oil – 5mg

An omega-3 fatty acid that supports the nervous system, cardiovascular system and reduced inflammation.

Functional supplements. Driven by science, powered by nature.
