

FORMULATED FOR PUPPIES.

- Supports High Growth Puppy Stage
- Aids in Energy Production & Enzyme Activation

METABOLISM SUPPORT.

- Aids in Carbohydrate, Fat & Protein Metabolism
- Helps Vitamin & Mineral Absorption

IMMUNE HEALTH.

- Echinacea Supports Immune System
- Helps Maintain Proper Hydration & Electrolyte Balance

ULTRA PREMIUM PUPPY MULTI

+ IMMUNITY

Young dogs have significant nutritional needs during the high growth puppy stage. This premium formula has been developed to provide support for dogs less than one year by aiding in carbohydrate, fat and protein metabolism, vitamin and mineral absorption, energy production, enzyme activation, and helping to maintain proper hydration and electrolyte balance. Plus 50mg of Echinacea per soft chew supports the immune system.

DIRECTIONS FOR USE

Dogs up to 10 lbs: 1 Soft Chew Daily

Dogs 11 to 20 lbs: 2 Soft Chews Daily

Dogs 21 to 30 lbs: 3 Soft Chews Daily

Dogs Over 30 lbs: 4 Soft Chews Daily

This Scientifically Formulated Puppy Multivitamin Includes the Following Active Ingredients per Soft Chew

WATER SOLUBLE VITAMINS

Have to be supplied on a daily basis because they are continually broken down and excreted.

Choline – 75mg

Required for proper transmission of nerve impulses and for utilization of sulfur-containing amino acids.

Pantothenic Acid – 1mg

Required for energy and for protein metabolism.

Thiamine – 500mcg

Promotes a good appetite and normal growth. Is required for energy production.

Riboflavin – 500mcg

Promotes growth.

Folic Acid – 25mcg

Works together with vitamin B12 in many of the bodies chemical reactions.

Biotin – 5mcg

A component of several important enzyme systems.

Niacinamide – 10mg

A constituent of many enzymes that process carbohydrates, proteins and fats.

Pyridoxine – 500mcg

Important in the metabolism of proteins and in the formation of red blood cells.

Vitamin C – 50mg

Participates in the formation of bones, teeth and soft tissue. Is an antioxidant that is helpful during times of stress. Is abundant in fresh foods, but is killed during the high temperature processing of dog foods.

Vitamin B12 – 0.5mcg

Necessary for normal DNA synthesis and intestinal function.

FAT SOLUBLE VITAMINS

Vitamin A – 1,000 IU

Necessary for proper vision, especially night vision.

Important in bone growth, reproduction, and maintenance of tissues such as the lungs, intestines and skin.

Vitamin D3 – 125 IU

Critical to the dog's ability to use calcium and phosphorus for bone and cartilage growth and maintenance.

Vitamin E – 10 IU

An Antioxidant that protects cells from oxidative damage. Especially important for muscular and reproductive function. Is helpful during times of stress. Is abundant in fresh foods, but is killed during the high temperature processing of dog foods.

MINERALS

Minerals are present in small amounts in the tissues of all living things. Teeth, bones, muscles and nerves have especially high mineral content. Minerals can be divided into two groups: the major minerals and the trace minerals.

MAJOR MINERALS

Required in gram amounts each day.

Magnesium – 1mg

Essential for many of the cells enzymatic reactions. Also helps promote the absorption and metabolism of many other vitamins and minerals, including vitamins C and E, calcium and phosphorus. Important in bone growth and development.

Potassium – 25mg

Helps nerves to function and muscles to contract. Helps heartbeat to stay regular. Also helps move nutrients into cells and waste products out of cells.

TRACE MINERALS

Required in milligrams or microgram amounts per day.

Iron – 1mg

Is present in every cell in the body. It is particularly important, along with protein and copper, for the production of red blood cells, which are responsible for transporting oxygen from the lungs to every part of the body.

Copper – 50mcg

A trace mineral that has many different functions. It is needed for the production of blood and for the proper absorption of iron. It is also involved in the production of connective tissue and in healing.

Zinc – 1mg

Important in the metabolism of several vitamins, particularly the B-vitamins. Zinc is also a component of several enzymes needed for digestion and metabolism and it promotes healing as well. Your dog needs zinc for proper coat health.

AMINO ACIDS

L-Taurine – 25mg

Taurine is found in several organs, and its benefits are widespread. Its direct roles include: Maintaining proper hydration and electrolyte balance in cells, Forming bile salts, which play an important role in digestion, Regulating minerals such as calcium within cells. Supporting the general function of the central nervous system and eyes. Regulating immune system health and antioxidant function.

BOTANICALS

Echinacea – 50mg

Stimulates the immune system.

Functional supplements. Driven by science, powered by nature.
