The proprietary blend of essential fatty acids, key vitamins and minerals and dandelion root provides not only for skin and coat health, but also supports the nervous system, cardiovascular system and joint health.

DIRECTIONS FOR USE

Dogs up to 20 lbs: 1 Soft Chew Daily

Dogs 21-80 lbs: 2 Soft Chews Daily

Dogs Over 80 lbs: 3 Soft Chews Daily

This Scientifically Formulated Skin & Coat Solution Includes the Following Active Ingredients per Soft Chew

Fish Oil – 200mg

Rich in omega-3 fatty acids, these oils hydrate the skin and reduce inflammation.

Linoleic Acid – 50mg

An omega-6 fatty acid, linoleic acid hydrates hair and improves its quality while nourishing the skin and helping it to retain moisture.

Dandelion Root – 50mg

A naturally occurring, powerful antioxidant, dandelion root has many properties to help improve the skin. It helps to fight free radicals protect against sun damage. Dandelion also helps to reduce inflammation and improves the tone and texture of the skin.

Choline – 2mg

Helps to maintain the proper level of B vitamins that help in the production of energy, collagen and elastin, which are essential for firm and smooth skin. It's antioxidant properties also help to preserve the skins elasticity and prevent free radical damage to skin cells.

Inositol – 100mcg

Promotes healthy hair and skin – a deficiency may lead to hair loss. Inositol helps to keep fats from collecting in the body, particularly in the liver. Inositol is efficient in converting nutrients into energy. The highest levels of Inositol concentrations are found in the heart and brain; inositol works with neurotransmitters in message circulation.

Vitamin A – 1500 IU

Necessary for proper vision, especially night vision. Important in bone growth, reproduction, and maintenance of tissues such as the lungs, intestines and skin.

Vitamin D3 – 300 IU

Critical to the dog's ability to use calcium and phosphorus for bone and cartilage growth and maintenance.

Vitamin E – 25 IU

An Antioxidant that protects cells from oxidative damage. Especially important for muscular and reproductive function. Is helpful during times of stress. Is abundant in fresh foods, but is killed during the high temperature processing of dog foods.

Zinc – 2mg

Important in the metabolism of several vitamins, particularly the B-vitamins. Zinc is also a component of several enzymes needed for digestion and metabolism and it promotes healing as well. Your dog needs zinc for proper coat health.

Functional supplements. Driven by science, powered by nature.
